

Anti-Afadin (I-Afadin)

Code Number : Afadin-Rb-Af900 (rabbit, RRID :)

Afadin-GP-Af690 (guinea pig, RRID :)

Size : Size : 20 µg and 50 µg / See label on vial

(affinity-purified with antigen polypeptide)

Formulation : Liquid ; 200 µg/ml in PBS with 0.05% NaN₃.

Storage : Store at cool temp. (2-10°C)

The antibody can be stored at 2-10°C. The antibody can be also aliquotted and stored at -80°C for long-term storage. Avoid repeated freeze-thawing. Non-hazardrous. No MSDS required.

Species : rabbit / guinea pig, polyclonal

Antigen : mouse, C-terminus 33 aa (1788-1820aa; NM_010806.1). This region is specific to the long form of afadin (I-afadin).

Specificity : mouse (others not tested)

Immunohistochemistry detects punctate labeling, consistent with a previous study (Inagaki et al., J. Comp. Neurol., 460:514-524, 2003). In the hippocampal CA3, intense punctate labeling is clearly found along pyramidal cell dendrites in the stratum lucidum, a mossy fiber-recipient layer.

Applications : In general, affinity-purified antibody is used at around 1 microgram/ml for immunoblot and immunohistochemistry. The most appropriate concentration should be determined by users, because it depends on contents in given cells, tissues and organs.

ご注意 : 本商品には 0.1 % 未満のアジ化ナトリウムが入っています。誤って目や口に入ったり、皮膚に付着した場合は大量の水で洗い流してください。
