

Anti-CK-B

(cytoplasmic creatine kinase, brain type)

Code Number : CKB-Rb-Af427 (rabbit, RRID : AB_2571679)

: CKB-GP-Af562 (guinea pig, RRID : AB_2571680)

Size : 20 µg and 50 µg / See label on vial

(affinity-purified with antigen polypeptide)

Formulation : Liquid ; 200 µg/ml in PBS with 0.05% NaN₃.

(affinity-purified with antigen polypeptide)

Storage : Store at cool temp (2-10°C).

The antibody can be stored at 2-10°C. The antibody can be also aliquotted and stored at -80°C for long-term storage. Avoid repeated freeze-thawing. Non-hazardrous. No MSDS required.

Species : rabbit / guinea pig , polyclonal

Antigen : mouse CKB, 1-27 aa

(NM021273)

Specificity : Mouse (others not tested)

Immunoblot detects a single protein band at 45 kDa. This stains astroglia intensely and interneurons weakly in the brain.

Applications : In general, affinity-purified antibody is used at around 1 microgram/ml

for immunoblot and immunohistochemistry. The most appropriate concentration should be determined by users, because it depends on contents in given cells, tissues and organs.

Research Use : For research use only, not for use in diagnostic procedures.

Remarks : All rabbit and guinea pig antibodies are similar in titer and specificity.
