(affinity-purified with antigen polypeptide)

Storage : Store at cool temp. (2-10°C)

The antibody can be stored at 2-10°C. The antibody can be also aliquotted and stored at -80°C for long-term storage. Avoid repeated freeze-thawing. Non-hazardrous. No MSDS required.

Species : rabbit / guinea pig / goat,
polyclonal

Antigen : mouse, DARPP32 163-194 aa
(NM_144828)

Specificity : mouse (others not tested)

Immunoblot detects a single protein band at 32 kDa.in HEK cell lysates transfected with mouse DARPP32 and in brain homogenates. This strongly and almost selectively stains medium spiny neurons in the striatum (see reference 1).

Antibody check: DARPP (C32; Rabbit), section: 4% PFA-microslicer

Applications : In general, affinity-purified antibody is used at around 1 microgram/ml for immunoblot and immunohistochemistry. The most appropriate concentration should be determined by users, because it depends on contents in given cells, tissues and organs.
