

Anti-GluD1-C (GluR δ 1)

(glutamate receptor subunit δ 1)

Code Number : GluD1C-Rb-Af1390 (rabbit, RRID : AB_2571757)

GluD1C-Go-Af840 (goat, RRID : AB_2571758)

GluD1C-GP-Af860 (guinea pig, RRID : AB_2571759)

Size : 20 μ g and 50 μ g / See label on vial

(affinity-purified with antigen polypeptide)

Formulation : Liquid ; 200 μ g/ml in PBS with 0.05% NaN₃.

Storage : Store at cool temp. (2-10°C)

The antibody can be stored at 2-10°C. The antibody can be also aliquotted and stored at -80°C for long-term storage. Avoid repeated freeze-thawing. Non-hazardrous. No MSDS required.

Species : rabbit / goat / guinea pig, polyclonal

Antigen : mouse GluD1 (NM_008166), C-terminal 895-932 aa, intracellular epitope,

Specificity : moue (others not tested)

The specificity has been verified by knockout mouse brains, and has no cross reactivity to GluD2 (see a reference of Konno et al., 2014).

Applications : In general, affinity-purified antibody is used at around 1 microgram/ml for immunoblot and immunohistochemistry. The most appropriate concentration should be determined by users, because it depends on contents in given cells, tissues and organs.

Research Use : For research use only, not for use in diagnostic procedures.

ご注意 : 本商品には 0.1 % 未満のアジ化ナトリウムが入っています。誤って目や口に入ったり、皮膚に付着した場合は大量の水で洗い流してください。

Distributor : NITTOBO MEDICAL CO., LTD

Manufacture : FRONTIER INSTITUTE CO., LTD

email : nmd-tokuhan@nittobogrp.com

Remarks : For immunohistochemistry for neuronal iGluRs, users should adopt postembedding immunogold for electron microscopic detection and protease predigestion or fresh frozen sections for light microscopic detection (see the below reference).
